This project was funded by the European Union's Internal Security Fund — Police, under Grant Agreement No. 823683.

Executive Summary

Deliverable D6.3a 'e-Newsletters No. 1-5' is developed in accordance with the description of activities under Grant Agreement No 823683, 'ARMOUR - A radical model of resilience for young minds' (ARMOUR). It reflects the overall objectives of the ARMOUR project in disseminating information and raising the stakeholders' awareness on the psychological and community behavioural and communications strategies aimed at correcting reactions to perceived or real grievances and developing resilience to push and pull factors involved in advancing radicalization and violent extremism.

The ARMOUR Communication and Dissemination Plan is carried out under Work Package 6 'Communication, Dissemination and Leverage' (see *Deliverable D6.1 'Communication and Dissemination Plan (CDP), logo and project templates'*) and serves to design and implement the communication and dissemination ARMOUR activities, including building strong relations with stakeholders and disseminating the project results across the widest possible range of audiences.

The entire ARMOUR communication framework is based on the implementation of integrated tools and channels which are chosen according to the main characteristics and values of the target audiences, the project's key messages, and type of information to be provided. Important part of the communication framework is the regular development of appropriate and engaging communication materials, including newsletters. Thus, the present document describes the development of the first set of e-newsletters (No. 1-5) published during the January – October 2019 period, as well as a general overview of dissemination results.
